**FOR IMMEDIATE RELEASE:**

**Alan C. McClure Associates President Scott McClure  
Elected a Fellow of SNAME**

HOUSTON, Texas – June 5, 2013: Alan C. McClure Associates (ACMA), one of the industry's premier naval architecture and engineering firms,

announced today that ACMA President Scott McClure was presented with his Certificate as a Fellow by the council of SNAME (Society of Naval Architects and Marine Engineers) during a function held in connection with the 2013 Offshore Technology Conference (OTC) in Houston, Texas.

*SNAME President Peter Noble presents  
ACMA President Scott McClure with his  
SNAME Fellow's Certificate*

"This is a high honor, and well deserved", said SNAME President Peter Noble. "While other grades of membership in SNAME can be gained through education and experience, the grade of Fellow is conferred by the Council of the Society and reserved exclusively for those who have made outstanding contributions to the profession. Less than 2% of the membership of SNAME attains this grade."

Noble went on to note that Scott McClure has been a respected member of this community for many years, following in the footsteps of his father, the late Alan C. McClure, who was elected a Fellow of SNAME in 1987. "In addition to his business accomplishments, Scott has always given back to his profession by not only being an active member of SNAME, but also encouraging and supporting members of the ACMA team to participate in the organization," said Noble. "I've known Scott for over 25 years and have been pleased to see how he has developed into a seasoned professional leading his company to a place of respect in the offshore and marine community."

Founded in 1893, the Society of Naval Architects and Marine Engineers is an international community for professionals working in maritime and ocean technologies, with a membership of around 7,000 spread around the globe. SNAME is one of the founding technical societies behind the annual OTC.

**About Alan C. McClure Associates, Inc.**

Headquartered in Houston, Texas, Alan C. McClure Associates, Inc. ([www.acma-inc.com](http://www.acma-inc.com)) is one of the industry's premier naval architecture and engineering firms, and has been providing a wide variety of design and engineering services to an international clientele for more than 35 years. Projects include drilling rigs, floating production systems and support craft for the offshore petroleum industry. Our array of services also includes project management, legal/arbitration consulting, surveying and negotiations. The ACMA staff and services represent the engineering disciplines necessary to successfully complete projects in naval architecture, marine engineering, electrical engineering, mechanical engineering and engineering mechanics.
